AGENDA

- Interaction through the comments in the videos
- Main planned modules:
  - Cloud and Microsoft Azure 101
  - Identity and Governance
  - Understanding Options, Cost and Optimization
  - Azure Storage and Database Services
  - Using Virtual Networks
  - Enabling Azure-to-On-Premises Connectivity
  - VMs and VM Scale Sets
  - Containers and other Compute Services
  - Load Balancing and Enabling External Connectivity to Azure Services
  - High Availability, Disaster Recovery and Migration with Azure
  - Secrets and Keys
  - Monitoring and Security
  - Infrastructure as Code and DevOps
  - Other Key Azure Technologies to Complete your Azure Environment

3

SOUP TO NUTS

- Goal is to start from the beginning
- Build in a logical way from nothing to having a running Azure environment

4

MASTER CLASS EVOLUTION

- Technology changes
- I will update modules over time
- I will add/remove potentially
- I will reference and link to deeper dives
- Make sure to subscribe and set the notification bell to find out
- Use the playlist
- GitHub repo for the code linked from playlist

5

STAY CURRENT

- I post a weekly update every Sunday lunchtime
- Less than 15 minutes covering all the previous weeks changes

AZURE INFRASTRUCTURE WEEKLY UPDATE

6

## MICROSOFT CERTIFICATION?

- This is not focused on any specific certification
- My focus is to teach you Azure
- However this would help with:

Microsoft CERTIFIED
AZURE FUNDAMENTALS
★

Microsoft CERTIFIED
AZURE ADMINISTRATOR
ASSOCIATE
★★
